- Remove slides.
- Reorder slides with up/down controls.
- Replace a slide image.
- Edit Dutch title/text and English title/text.
- Export `slides.json`, a standalone `index.html`, or a complete carrousel module zip.
- Return the exported carrousel/ folder or module zip for inclusion in the project zip.

Spelling rule

The project spelling is carrousel. Do not use carousel or caroussel in current UI/help text.

Dutch language data

Dutch sample sentences and language examples remain unchanged. English mode translates UI/help/documentation, not the Dutch test data.
